# CRESSKILL ROBOTICS

We are Cresskill High School's FIRST Robotics Teams #6983 and #8485. FIRST (For Inspiration and Recognition of Science and Technology) is a multi-national, non-profit organization that promotes science and technology education. We partner with local businesses, educational institutions, and volunteer mentors to cultivate skills, teamwork, strategic thinking, and community outreach.

A FIRST team spends thousands of dollars on registration fees, a basic kit of parts, additional building materials, robot/team transportation, administrative expenses, and more.

In addition to funds we seek mentors who are specialists or hobbyists in engineering design, machine operation, programming, and marketing, who are willing to work with highly motivated students of our school.

We invite you to be a part of this amazing, educational endeavor!

## **Family STEM Night 2017**

Dear Potential Sponsor,

We are Cresskill High School's FIRST Robotics Teams #6983 and #8485. FIRST (For Inspiration and Recognition of Science and Technology) is a multi-national, non-profit organization that promotes education through science and technology. This is our fourth year competing in the FTC (FIRST Tech Challenge) robotics competitions. The FTC introduces a new challenge annually, inviting high school teams to compete in its robotics competitions at various regional events.

Family STEM Night was created in 2014 by Cresskill's first high school robotics team with assistance from the Cresskill STEM Academy Class of 2017. Sharing a common goal of engaging and educating young members of the community in the exciting and multi-various topic STEM field, the two groups came together to establish an annual event in which students and their families could partake in fun, interactive STEM-related games and activities.

The teams use this night to demonstrate our robot and all the work we've accomplished over the course of the year. Despite all the funds we have raised over the course of this year and years past, we still do not have enough money to cover the cost of materials and equipment needed for our event. We would like to extend an invitation for you to take part in our event by sponsoring one or more of the booths set up for Family STEM Night. In return for your contributions, we will be sure to recognize you as an honorary sponsor of our event. In addition, we will also provide you photos from our fun filled evening!

Below we have attached the Family STEM Night Sponsorship Form. You may choose to select one of our sponsorship packages or you may make a donation of an amount of your choosing. As a sponsor you are helping to promote the education of the younger members of our community by introducing them to the wonderfully intricate fields of STEM.

We sincerely hope that you choose to assist us in the production and planning of this beloved event and make it a great opportunity for all of our partakers. We look forward to partnering with you and hope that we can continue this partnership for many years to come!

Thank you for your time.

Sincerely,

Isabella Min
